

SECOND REGULAR SESSION

SENATE BILL NO. 1009

90TH GENERAL ASSEMBLY

INTRODUCED BY SENATOR BENTLEY.

Read 1st time February 14, 2000, and 1,000 copies ordered printed.

4496S.01I

TERRY L. SPIELER, Secretary.

AN ACT

To repeal section 82.1035, RSMo Supp. 1999, relating to geographical information systems, and to enact in lieu thereof one new section relating to the same subject.

Be it enacted by the General Assembly of the State of Missouri, as follows:

Section A. Section 82.1035, RSMo 1994, is repealed and one new section enacted in lieu thereof, to be known as section 67.1850, to read as follows:

67.1850. 1. As used in this section, the following terms mean:

- (1) "Community", any municipality or county as defined in this section;**
- (2) "County", any county of the first classification without a charter form of government;**
- (3) "Geographical information system", a computerized, spatial coordinate mapping and relational database technology which:**
 - (a) Captures, assembles, stores, converts, manages, analyzes, amalgamates and records, in the digital mode, all kinds and types of information and data;**
 - (b) Transforms such information and data into intelligence and subsequently retrieves, presents and distributes that intelligence to a user for use in making the intelligent decisions necessary for sound management;**
- (4) "Municipality", any city with a population of one hundred forty thousand or more inhabitants.**

2. The development of geographical information systems has not been undertaken in any large-scale and useful way by private enterprise. The use of modern technology can enhance the planning and decision-making processes of communities. The development of geographical information systems is a time

EXPLANATION--Matter enclosed in bold-faced brackets [thus] in this bill is not enacted and is intended to be omitted in the law.

consuming and expensive activity. In the interest of maintaining community governments open and accessible to the public, information gathered by communities for use in a geographical information system, unless properly made a closed record, should be available to the public. However, access to the information in a way by which a person could render the investment of the public in a geographical information system a special benefit to that person, and not to the public, should not be permitted.

3. Any community as defined in this section may create a geographical information system for the community. The scope of the geographical information system shall be determined by the governing body of the community. The method of creation, maintenance, use and distribution of the geographical information system shall be determined by the governing body of the community.

4. The information collected or assimilated by a community for use in a geographical information system shall not be withheld from the public, unless otherwise properly made a closed record of the community as provided by section 610.021, RSMo. The information collected or assimilated by a community for use in a geographical information system need not be disclosed in a form which may be read or manipulated by computer, absent a license agreement between the community and the person requesting the information.

5. Information collected or assimilated by a community for use in a geographical information system and disclosed in any form, other than in a form which may be read or manipulated by computer, shall be provided for a reasonable fee, as established by section 610.026, RSMo. A community maintaining a geographical information system shall make maps and other products of the system available to the public. The cost of the map or other product shall not exceed a reasonable fee representing the cost to the community of time, equipment and personnel in the production of the map or other product. A community may license the use of a geographical information system. The cost of licensing a geographical information system may reflect the:

(1) Cost to the community of time, equipment and personnel in the production of the information in a geographical information system or the production of the geographical information system;

(2) Cost to the community of the creation, purchase, or other acquisition of the information in a geographical information system or of the geographical information system; and

(3) Value of the commercial purpose, if any, for which the information in a geographical information system or a geographical information system is to be used.

6. The provisions of this section shall not hinder the daily or routine collection of data, as defined in section 569.093, RSMo, from the geographical information system by real estate brokers and agents, title collectors, developers, surveyors, utility

companies, banks, or mortgage companies, nor shall the provisions allow for the charging of fees for the collection of such data exceeding that allowed pursuant to section 610.026, RSMo. The provisions of this section, however, shall allow a community maintaining a geographical information system to license and establish costs for the use of the system's computer program and computer software, as defined in section 569.093, RSMo.

7. A community distributing information used in a geographical information system or distributing a geographical information system shall not be liable for any damages which may arise from any error which may exist in the information or the geographical information system.

[82.1035. 1. As used in this section, the following terms mean:

- (1) "Community", any municipality as defined in this section;
- (2) "Geographical information system", a computerized, spatial coordinate mapping and relational database technology which:
 - (a) Captures, assembles, stores, converts, manages, analyzes, amalgamates and records, in the digital mode, all kinds and types of information and data;
 - (b) Transforms such information and data into intelligence and subsequently;
 - (c) Retrieves, presents and distributes that intelligence to a user for use in making the intelligent decisions necessary for sound management;
- (3) "Municipality", any city with a population of three hundred fifty thousand or more inhabitants which is located in more than one county.

2. The development of geographical information systems has not been undertaken in any large-scale and useful way by private enterprise. The use of modern technology can enhance the planning and decision making processes of communities. The development of geographical information systems is a time consuming and expensive activity. In the interest of maintaining community governments open and accessible to the public, information gathered by communities for use in a geographical information system, unless properly made a closed record, should be available to the public. However, access to the information in a way by which a person could render the investment of the public in a geographical information system a special benefit to that person, and not to the public, should not be permitted.

3. Any community as defined in this section may create a geographical information system for the community. The scope of the geographical information system shall be determined by the governing body of the community. The method of creation, maintenance, use and distribution of the geographical information system shall be determined by the governing body of the community.

4. The information collected or assimilated by a community for use in a

geographical information system shall not be withheld from the public, unless otherwise properly made a closed record of the community as provided by section 610.021, RSMo. The information collected or assimilated by a community for use in a geographical information system need not be disclosed in a form which may be read or manipulated by computer, absent a license agreement between the community and the person requesting the information.

5. Information collected or assimilated by a community for use in a geographical information system and disclosed in any form, other than in a form which may be read or manipulated by computer, shall be provided for a reasonable fee, as established by section 610.026, RSMo. A community maintaining a geographical information system shall make maps and other products of the system available to the public. The cost of the map or other product shall not exceed a reasonable fee representing the cost to the community of time, equipment and personnel in the production of the map or other product. A community may license the use of a geographical information system. The cost of licensing a geographical information system may reflect the:

- (1) Cost to the community of time, equipment and personnel in the production of the information in a geographical information system or the production of the geographical information system;
- (2) Cost to the community of the creation, purchase, or other acquisition of the information in a geographical information system or of the geographical information system; and
- (3) Value of the commercial purpose, if any, for which the information in a geographical information system or a geographical information system is to be used.

6. The provisions of this section shall not hinder the daily or routine collection of data, as defined in section 569.093, RSMo, from the geographical information system by real estate brokers and agents, title collectors, developers, surveyors, utility companies, banks, or mortgage companies, nor shall the provisions allow for the charging of fees for the collection of such data exceeding that allowed pursuant to section 610.026, RSMo. The provisions of this section, however, shall allow a community maintaining a geographical information system to license and establish costs for the use of the system's computer program and computer software, as defined in section 569.093, RSMo.

7. A community distributing information used in a geographical information system or distributing a geographical information system shall not be liable for any damages which may arise from any error which may exist in the information or the geographical information system.]
