MESSAGES FROM THE HOUSE

The following message was received from the House of Representatives through its Chief Clerk:

Mr. President: I am instructed by the House of Representatives to inform the Senate that the House has taken up and adopted and third read **HS** for **HCR 6**.

HOUSE SUBSTITUTE FOR HOUSE CONCURRENT RESOLUTION NO. 6

WHEREAS, the United States Fish and Wildlife Service has recommended that the United States Army Corps of Engineers implement the so-called "spring rise-split season" plan for operation of the Missouri River mainstem reservoir system. This plan would result in an increase in the flow of the Missouri River in the spring and a reduction of the flow in the summer of each year, purportedly to improve habitat for the threatened and endangered pallid sturgeon, least tern and piping plover; and

WHEREAS, additional changes under consideration by the United States Army Corps of Engineers to the Missouri River Master Manual would result in the storage of more water in the upstream reservoirs while decreasing the amount of water available downstream for designated uses. These changes would shorten the navigation season on the Missouri River by twenty-seven days in November and put at risk Mississippi River navigation as well; and

WHEREAS, analysis of the proposed changes by the state of Missouri and the United States Army Corps of Engineers has indicated these changes will fail to improve and will potentially diminish habitat for the species in question, will increase the risk of flooding along the Missouri River, and will result in a decrease in river levels in early summer and fall which will impact navigation and other designated uses on the Missouri and Mississippi Rivers; and

WHEREAS, habitat restoration along the lower Mississippi River has demonstrated great success in aiding the recovery of these species and a similar approach should be given the opportunity to succeed on the Missouri River; and

WHEREAS, these plans have the potential for severe impact on any industry which uses the Missouri River or Mississippi River to transport products and the potential to increase risk of flooding in river communities and on farm land in the Missouri and lower Mississippi River basins; and

WHEREAS, these proposals do not adequately address the concerns and needs of states in the lower Missouri and Mississippi River basin, and will not realize the purported benefit of increasing habitat for endangered species; and

WHEREAS, the Missouri departments of natural resources, conservation and transportation have opposed these plans and have informed the Fish and Wildlife Service and the United States Army Corps of Engineers of their concerns regarding the potential impact on the state's river communities, lands, businesses and wildlife habitat:

NOW, THEREFORE, BE IT RESOLVED that the members of the Missouri House of Representatives, Ninety-first General Assembly, First Regular Session, the Senate concurring therein, hereby urge the Governor to protest against any proposals that would so negatively impact beneficial uses of the lower Missouri and Mississippi Rivers and would not significantly improve conditions for the species of concern; and

BE IT FURTHER RESOLVED that the members of the General Assembly urge the Department of Natural Resources, the Department of Conservation and the Department of Transportation to continue to insist that any plan involving the operations of the Missouri River improve the Missouri River for all beneficial uses and be sure any river management changes are based on sound science; and

BE IT FURTHER RESOLVED that the Chief Clerk of the House of Representatives be instructed to prepare properly inscribed copies of this resolution for the United States Fish and Wildlife Service, the United States Army Corps of Engineers, the Governor of Missouri, the Director of the Department of Natural Resources, the Director of the Department of Conservation and the Director of the Department of Transportation.

In which the concurrence of the Senate is respectfully requested.
