Sen. Stouffer Supporting Construction of New Medical Facility in Brunswick

JEFFERSON CITY — Sen. Bill Stouffer, R-Napton, today announced he is supporting Grand River Medical Clinic’s efforts to procure funding for a new medical building in Brunswick.

“I am 100-percent behind any effort to provide better health-care options for rural Missourians,” Stouffer said. “Grand River Medical Clinic offers excellent medical care to members of the 21st District, but a new facility is needed to ensure those in the area have the access to health care they need.”

The Chariton County Community Foundation is working to raise \$700,000 from local, state and federal sources. Funding would assist in the construction of the new health-care facility.

“Chariton County volunteers have taken the lead in raising funds for this needed project, and I applaud the hard work they have already put forth,” Stouffer said. “I only hope that my support will help speed this project along to improve access to medical care.”
