To repeal section 281.260, RSMo, and to enact in lieu thereof one new section relating to pesticides.

Be it enacted by the General Assembly of the State of Missouri, as follows:

Section A. Section 281.260, RSMo, is repealed and one new section enacted in lieu thereof, to be known as section 281.260, to read as follows:

281.260. 1. Every pesticide which is distributed, sold, offered for sale or held for sale within this state, or which is delivered for transportation or transported in intrastate commerce or between points within this state through any point outside of this state, shall be registered in the office of the director, and the registration shall be renewed annually.

2. The registrant shall file with the director a statement including:

   (1) The name and address of the registrant and the name and address of the person whose name will appear on the label, if other than the registrant;
   (2) The name of the pesticide;
   (3) Classification of the pesticide; and
   (4) A complete copy of the labeling accompanying the pesticide and a statement of all claims to be made for it, including directions for use.
3. The registrant shall pay an annual fee of two hundred dollars for each product registered in any calendar year or part thereof. The fee shall be deposited in the state treasury to the credit of the agriculture protection fund created in section 261.200 to be used solely to administer the pest and pesticide programs of the department of agriculture. The director may deposit up to seven percent of the fee in the pesticide education fund under section 281.265. If the funding exceeds the reasonable costs to administer the programs as set forth herein, the department of agriculture shall reduce fees for all registrants if the fees derived exceed the reasonable cost of administering the pest and pesticide programs of the department of agriculture. All such registrations shall expire on December thirty-first of any one year, unless sooner cancelled. A registration for a special local need pursuant to subsection 6 of this section, which is disapproved by the federal government, shall expire on the effective date of the disapproval.

4. Any registration approved by the director and in effect on the thirty-first day of December for which a renewal application has been made and the proper fee paid shall continue in full force and effect until such time as the director notifies the applicant that the registration has been renewed, or otherwise denied, in accord with the provisions of subsection 9 of this section. Forms for reregistration shall be mailed to registrants at least ninety days prior to the expiration date.

5. If the renewal of a pesticide registration is not filed prior to January first of any one year, an additional fee of fifty dollars shall be assessed and added to the original fee and shall be paid by the applicant before the
registration renewal for that pesticide shall be issued;
provided, that, such additional fee shall not apply if the
applicant furnishes an affidavit certifying that he or she
did not distribute such unregistered pesticide during the
period of nonregistration. The payment of such additional
fee is not a bar to any prosecution for doing business
without proper registry. The fee shall be credited to the
agriculture protection fund created under section 261.200 to
be used solely to administer the pest and pesticide programs
of the department of agriculture. If the funding exceeds
the reasonable cost to administer the programs as set forth
herein, the department of agriculture shall reduce fees for
all registrants if the fees derived exceed the reasonable
cost of administering the pest and pesticide programs of the
department of agriculture.

6. Provided the state complies with requirements of
the federal government to register pesticides to meet
special local needs, the director shall require that
registrants comply with sections 281.210 to 281.310 and
pertinent federal laws and regulations. Where two or more
pesticides meet the requirements of this subsection, one
shall not be registered in preference to the other.

7. The director may require the submission of the
complete formula of any pesticide to approve or deny product
registration. If it appears to the director that the
composition and efficacy of the pesticide is such as to
warrant the proposed claims for it and if the pesticide and
its labeling and other material required to be submitted
comply with the requirements of sections 281.210 to 281.310,
he or she shall register the pesticide.

8. Provided the state is authorized to issue
experimental use permits, the director may:
(1) Issue an experimental use permit to any person applying for an experimental use permit if he or she determines that the applicant needs such permit in order to accumulate information necessary to register a pesticide under sections 281.210 to 281.310. An application for an experimental use permit may be filed at the time of or before or after an application for registration is filed;

(2) Prescribe terms, conditions, and period of time for the experimental permit which shall be under the supervision of the director;

(3) Revoke any experimental permit, at any time, if he or she finds that its terms or conditions are being violated, or that its terms and conditions are inadequate to avoid unreasonable adverse effects on the environment.

9. If it does not appear to the director that the pesticide is such as to warrant the proposed claims for it or if the pesticide and its labeling and other material required to be submitted do not comply with the provisions of sections 281.210 to 281.310 or with federal laws, he or she shall notify the registrant of the manner in which the pesticide, labeling, or other material required to be submitted fail to comply with sections 281.210 to 281.310 or with federal laws so as to afford the registrant an opportunity to make the necessary corrections. If, upon receipt of such notice, the registrant insists that such corrections are not necessary and requests in writing that the pesticide be registered or, in the case of a pesticide that is already registered, that it not be cancelled, the director, within ninety days, shall hold a public hearing to determine if the pesticide in question should be registered or cancelled. If, after such hearing, it is determined that the pesticide should not be registered or that its
registration should be cancelled, the director may refuse
registration or cancel an existing registration until the
required label changes are accomplished. If the pesticide
is shown to be in compliance with sections 281.210 to
281.310 and federal laws, the pesticide will be registered.
Any appeals resulting from administrative decisions by the
director will be taken in accordance with sections 536.100
to 536.140.

10. For purposes of this section, any pesticide
registered by the United States Environmental Protection
Agency under the Federal Insecticide Fungicide and
Rodenticide Act (FIFRA), a pesticide label approved by the
United States Environmental Protection Agency, or a
pesticide label consistent with the most recent human health
assessment performed under FIFRA, or consistent with the
United States Environmental Protection Agency
carcinogenicity classification of the pesticide under FIFRA,
shall be sufficient to satisfy any requirement for a warning
label regarding health or safety or any other provision of
current law.

11. Notwithstanding any other provision of sections
281.210 to 281.310, registration is not required in the case
of a pesticide shipped from one plant or warehouse within
this state to another plant or warehouse within this state
when such plants are operated by the same persons.

[11.] 12. The director shall not make any lack of
essentiality a criterion for denying registration of a
pesticide except where none of the labeled uses are present
in the state. Where two or more pesticides meet the
requirements of sections 281.210 to 281.310, one shall not
be registered in preference to the other.
145  [12.] 13. Notwithstanding any other provision of law
to the contrary, the director may allow a reasonable period
of time for the retailer to dispose of existing stocks of
pesticides after the manufacturer or distributor has ceased
to register the product with the state. The method of
disposal shall be determined by the director.
