327.241. 1. After the board has determined upon such inquiry and by such methods as it may consider proper that [he] **an applicant** possesses the qualifications entitling [him] **such applicant** to be examined, each applicant for examination and [registration] **licensure** as a professional engineer in Missouri shall appear before the board or its representatives for examination at the time and place specified by the board in a written notice to each such applicant, provided that an examination shall be given at least once in each calendar year.

2. The written examination or examinations shall be of such form, content and duration as shall be determined by the board, to thoroughly test the qualifications of each applicant to practice as a professional engineer in Missouri.

3. Any applicant to be eligible for [registration] **a license** must make a grade on each examination of at least seventy percent.

4. The engineering examination shall consist of two parts; the first part may be taken by any person after [he] **such person** has satisfied the educational requirements of section 327.221, or who is in his **or her** final year of study in an accredited school of engineering; and upon passing part one of the examination and providing proof that [he] **such person** has satisfied the educational requirements of section 327.221 and upon payment of the required fee, [he] **such person** shall be an [engineer in training, subject, however,] **engineer-intern, subject** to the other provisions of this chapter.

5. 6. Notwithstanding the provisions of subsections 4 and 5 of this section, the board may, in its discretion, provide by rule that any person who has graduated from and holds an engineering degree from an accredited school of engineering may thereupon be eligible to take both parts of the engineering examination and that upon passing said examination and acquiring four years of satisfactory engineering experience, after graduating and receiving a degree as aforesaid, shall be entitled to receive a [certificate of registration] **license** to practice as a professional engineer, subject, however, to the other provisions of this chapter.

7. Any person who has graduated from and has received a degree in engineering from an accredited school of engineering may then acquire four years of satisfactory engineering experience and thereafter take both parts of the examination and upon passing shall be entitled to receive a [certificate of registration] **license** to practice as a professional engineer, subject,

327.251. If an applicant fails to make the grade specified in section 327.241, he/**she** may apply for reexamination on a form to be furnished by the board, and if the application is approved, [he] **the applicant** may take another examination or examinations at any regularly scheduled examination upon payment of the required fee.

Any [certificate of registration] **license** or certificate of authority suspended and not reinstated within nine months of the suspension date, as above provided, shall expire and be void and the holder of the expired **license or** certificate shall have no rights or privileges [thereunder] **under such license or certificate**; but any person or corporation whose certificate has expired as aforesaid may within the discretion of the board, upon payment of the required fee, be [reregistered] **relicensed** or reauthorized under [his or its] **such person's or such corporation's** original registration number.

2. Each application for the renewal of a [registration] **license** or of a certificate of authority shall be on a form furnished to the applicant and shall be accompanied by the required fee; but no renewal fee need be paid by any [registered] professional engineer over the age of seventy-five.
